PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience transforming healthcare and enterprise data into actionable business insights through SQL, Python, Power BI, and Tableau. Proven track record of building KPI dashboards, automating reporting workflows, and improving operational decision-making across healthcare organizations. Experienced in EHR/EMR analytics, healthcare compliance, data governance, and AI-assisted reporting solutions that drive efficiency and reporting accuracy.

TECHNICAL SKILLS

Programming & Visualization: SQL, Python, Pandas, NumPy, Power BI, Tableau, DAX, Excel
Databases & Data Platforms: SQL Server, Snowflake, Amazon Redshift, Data Warehousing, Data Modeling, ETL, Data Integration, Query Optimization
Data Governance & Quality: Data Validation, Data Reconciliation, Data Cleansing, Data Governance, Data Quality Management, Audit Support, SOX Compliance
Analytics & Reporting: Business Intelligence, KPI Reporting, Dashboard Development, Ad Hoc Analysis, Trend Analysis, Root Cause Analysis, Statistical Analysis, Forecasting, Executive Reporting, Data Storytelling
Generative AI & Advanced Analytics: Generative AI, AI-Assisted Analytics, Prompt Engineering, Intelligent Reporting, Automated Insights Generation, AI-Driven Data Analysis, Large Language Models (LLMs), Data Preparation for AI Workloads, Retrieval-Augmented Generation (RAG) Fundamentals, Generative Engine Optimization (GEO)
Tools & Methodologies: Jira, Confluence, Agile Scrum, UAT, Stakeholder Management, Process Improvement, Workflow Automation
Healthcare Analytics: EHR/EMR, Epic, Cerner, HL7, HIPAA, ICD-10, CPT Coding, Clinical Analytics, Population Health Analytics, Revenue Cycle Analytics, Quality Metrics Reporting

PROFESSIONAL EXPERIENCE

Data Analyst Universal Health Services USA	Jan 2025 - Present
- Developed and enhanced Power BI dashboards tracking operational, financial, and clinical KPIs, improving reporting efficiency by 30% and enabling leadership teams to make faster data-driven decisions. - Designed and optimized complex SQL queries across enterprise healthcare datasets, improving report performance and ensuring accurate delivery of business-critical insights for operational and clinical stakeholders. - Performed trend analysis, forecasting, and root cause investigations on patient utilization, operational performance, and quality metrics, helping identify improvement opportunities and support strategic planning initiatives. - Automated reporting workflows, dashboard refresh schedules, and data validation processes using SQL, Python, and Power BI, reducing manual effort by 40% while improving reporting consistency and accuracy. - Partnered with business leaders, clinical teams, and analysts to define KPI frameworks, reporting requirements, and analytics solutions that improved visibility into patient outcomes, resource utilization, and operational performance. - Analyzed healthcare operational and clinical datasets from Epic and Cerner systems to evaluate utilization trends, patient outcomes, and departmental performance while maintaining HIPAA compliance and data governance standards. - Supported AI-driven reporting initiatives by preparing high-quality datasets, validating data pipelines, and contributing to analytics workflows that enabled intelligent reporting, automated insights generation, and improved data accessibility for business users.	
Data Analyst Newgen Software, India	Aug 2020 - Aug 2023
- Analyzed large-scale operational and business datasets using SQL, Python, and Excel to support reporting, business intelligence initiatives, and performance monitoring. - Developed Tableau dashboards and KPI scorecards that improved reporting turnaround time by 30% and enhanced visibility into key business metrics. - Performed exploratory data analysis, trend forecasting, and root cause investigations to identify business risks, uncover operational inefficiencies, and recommend data driven process improvements. - Developed Python based automation and data validation solutions using Pandas and NumPy, reducing reporting preparation effort by 35% while improving data accuracy and consistency across business reports. - Participated in enterprise data migration projects by executing data validation, reconciliation, and testing activities to ensure data accuracy and completeness. - Collaborated with cross-functional stakeholders to translate business requirements into dashboards, reports, and actionable recommendations. - Delivered executive-level reports and ad hoc analyses that supported operational planning, business reviews, and strategic decision-making. - Improved data quality through proactive identification of reporting discrepancies, validation checks, and documentation of business rules.	

EDUCATION

Master of Science in Computer Science
City University of Seattle, Seattle, WA | June 2025

CERTIFICATIONS

- Microsoft Learn – Power BI Data Analyst Learning Path
- Databricks Fundamentals Accreditation
- Snowflake Hands-On Essentials Badge

PROJECTS

Healthcare Analytics Dashboard & KPI Reporting System | SQL, Power BI, Python

- Developed interactive Power BI dashboards and KPI reports using SQL and Python to analyze healthcare operational and clinical performance metrics, improving data visibility and decision-making.
- Automated data extraction, validation, and reporting workflows, reducing manual effort by 35% and enhancing reporting accuracy and efficiency.
